Hi – I know it seems too soon, but it is time to start getting ready for the June public science meeting. Because this one is a little bit different (BaP and TBA/ETBE), we are getting started on the website text a little early. Attached is a preliminary draft of what I would like to give to Maureen to start with (thanks to Dahnish for drafting this). It is still really preliminary. When the scientists send me their science topics next week, I will add that text – there are placeholders there now. Let me know if you would rather just review on the staging server and I will ask Maureen to start with this.

Upcoming dates:

March 24-25: Meeting internal to IRIS to discuss science topics before we meet with NRC
March 30-31: Meet with NRC to discuss science topics and expert nomination process (90 days in advance of meeting)
April 1-5: Post initial website announcing the meeting (coordinate with NRC)
April 30: Public Comment Draft release date/Open meeting registration (60 days ahead)
June 29-30: June public science meeting

Note: Sometime in the next two weeks we will also need to meet with NRC about the RDX experts and begin to build the agenda.

Thanks – please let me know if there are any times that would work for (or not work) for meetings. - Vicki
